

LOW VACUUM FOIL BOX

Low Vacuum Foil box provides high-efficiency cleaning of the synthetic wire and press felts of the paper machine. It carries away debris and water which is loosened by wire and felt cleaning showers.

Low Vacuum Foil box in the wire pit section is used for reduction of moisture in the paper. It can result in the reduction of the press picking by about 1/6th. Having width of 350 mm 3 Nos. Foil Strips of H.D. Polypic with end sealing strips of H.D. Polypic Deckle adjustment. Loops will be mounted on Dovetail groove to facilitate changing of loops during running machine.

Salient Features:

- Rigid construction.
- Foil body is fabricated from stainless steel of AISI 304 quality.
- Totally closed type Box.
- Haunter outlet at the drive side with 100 mm bend pipe.
- Vacuum connection fitted with Barometric Drop Leg.

Advantages:

- Available for all machine widths and speeds.
- Optimized and trouble-free drainage.
- Designed for vibration-free operation.
- Stays clean.
